This technical drawing is an exploded view of a mechanical assembly, likely a pump or motor. The components are numbered 1 through 146. The assembly is shown in a disassembled state to illustrate the relationship between parts. A circular inset provides a detailed view of a central component, showing its internal structure and various mounting points. The main assembly includes a base (1), a motor housing (2, 3, 4, 5), a central shaft (12), a pump head (6), and various seals, gaskets, and fasteners. The exploded view shows the sequence of assembly from the base up to the final cover (146). The inset shows a detailed view of a central component, possibly a valve or a seal, with various mounting points and internal features.

SAFARI125

This exploded view diagram illustrates the components of the SAFARI125 rear wheel assembly. The main assembly consists of a wheel rim (69) and a hub (60). A hub cap (62) is shown positioned to be installed onto the hub. A separate axle assembly (59) is shown at the bottom, designed to fit into the hub. The diagram uses leader lines to identify each part: 69 for the wheel rim, 62 for the hub cap, 60 for the hub, and 59 for the axle assembly.
